

Xeric Tapes

Single and double-sided bonding tapes

Description

Xeric single and double-sided tapes are polymer modified bitumen based.

Advantages

- Economical
- Waterproof
- Ease of use
- Easily cut and trimmed

Applications

- Fixing protection boards to waterproofing membranes.
- Sealing overlaps in polythene sheeting.
- Fixing pre-formed corners and profiles.
- Lap jointing of most types of DPC's.
- Repairs to bitumen membranes.
- General detailing and repairs in construction.

Installation

Surfaces should be dry and free from contaminants. Porous cementitious substrates should be primed with bitumen primer such as Xeric Prime.

Limitations

Do not apply to damp or wet surfaces or where temperatures are 5°C or below.

Technical Information

	Single Sided	Double Sided
Thickness	1.5mm	1.5mm
Puncture Resistance	250N Min	Not Tested
Water vapour Transmission	0.30g/m ² /day	0.30g/m ² /day
Water Penetration Transmission	Nil	Nil
Width	75/100/150mm	50/75/100/150mm
Length	19m	15m

Storage

Store in a clean dry area avoiding sunlight and contact with the elements.

Health and safety

No known health hazards in normal use. Wear gloves for prolonged contact. Refer to the material safety data sheet.
